KINGDOM OF CAMBODIA

Here are some of the key agricultural products and sectors in Cambodia

Rice: The most important crop, grown on the majority of the country's cultivated land area.

Cassava: Another major crop with significant growth in production.

Mango: One of the most widely grown fruits, with large areas dedicated to its cultivation.

Banana: Another very common crop, with a large number of households planting it.

Coconut: Widely planted and a common agricultural product.

Maize (Corn): A major cereal crop with significant annual growth in production.

Cashew: A growing crop and export product.

Rubber: A significant industrial crop and an important export commodity.

Sugarcane: An industrial crop with high growth in production.

Fruits: In addition to bananas and mangoes, other common fruits include jackfruit, citrus (lime, lemon, orange), and custard apple.
